PLATO GmbH receives TISAX label

TISAX stands for "Trusted Information Security Assessment Exchange" and is a registered trademark of the ENX Association. The ENX Association supports with TISAX on behalf of VDA the common acceptance of information security assessments in the automotive industry.

Information security has always been a high priority for PLATO. The secure handling of provided sensitive data and information is an essential customer service. We are therefore pleased to now be able to offer a verifiable industry standard with the TISAX label.

We have enhanced our IT security processes and taken extensive measures on protection of sensitive and confidential information. In doing so, we follow the question catalog of information security of the German Association of the Automotive Industry (VDA ISA). The assessment was conducted for our TISAX Scope ID S24RLP under the Assessment ID ACH999 by the TISAX audit provider DEKRA Certification GmbH. The result is exclusively retrievable over the [ENX portal](#). (TISAX and TISAX results are not intended for general public.)
